

AHMED SAAD ABDEL-SATTAR

SENIOR SYSTEM ADMINISTRATOR | TECHNICAL SUPPORT TEAM LEAD

Cairo, Egypt | +20 115 055 1243 | ahmedsaad200090@gmail.com

PROFESSIONAL SUMMARY

Technical Support and Cloud Team Leader with 4+ years of progressive experience in system administration, infrastructure operations, web hosting, cloud services, and technical support leadership. Experienced in directing daily support operations, coordinating incident and service-request workflows, monitoring SLA and KPI performance, and maintaining reliable Linux and Windows Server environments. Strong hands-on background in complex troubleshooting, cloud and hosting migrations, security hardening, backup and recovery, performance optimization, and support for commercial and custom-built applications. Recognized for mentoring engineers, improving operational workflows, and communicating clearly with technical teams, clients, and business stakeholders.

INDUSTRY RECOGNITION

Website Planet - Web Hosting Experts 2026 | Featured as a web hosting industry expert representing Thamara Cloud. Shared professional insights on technical support responsiveness, backup and disaster recovery, infrastructure reliability, scalability, and long-term business value. [Read the article](#)

PROFESSIONAL EXPERIENCE

AFFSQUARE | *Thamara Cloud Project*

Technical Support & Cloud Team Leader | Cairo, Egypt

Dec 2025 - Present

- Lead technical support and cloud operations, managing a team of engineers and coordinating the efficient handling of daily incidents, service requests, and customer escalations.
- Plan workload distribution, set priorities, review completed work, and maintain quality standards across support, infrastructure, and client-facing deliverables.
- Monitor SLA compliance and operational KPIs, including response time, resolution time, escalation handling, service quality, and support-team performance.
- Manage and support cloud infrastructure environments, including service deployment, monitoring, resource optimization, availability checks, and ongoing operational maintenance.
- Plan and supervise client migrations between on-premises and cloud hosting environments, with a focus on data integrity, service continuity, and minimal downtime.
- Troubleshoot and resolve complex issues across Linux, Windows Server, cPanel, WHM, Plesk, WordPress, email systems, and hosted business applications.
- Review and validate technical work completed by engineers and interns before production deployment or customer delivery, reducing operational risk and rework.
- Train, onboard, and mentor technical support engineers and interns, strengthening troubleshooting ability, technical documentation, customer communication, and escalation judgment.
- Evaluate trainee performance through practical assessments and real-case scenarios, and contribute to selection, development, and readiness decisions.
- Coordinate with internal teams to resolve critical infrastructure incidents, maintain service stability, and ensure appropriate communication during high-priority cases.
- Apply access-control policies, security hardening, proactive monitoring, capacity planning, backup practices, and operational procedures to support secure and scalable services.
- Contribute to continuous improvement of support workflows, incident management, migration planning, documentation standards, and overall operational efficiency.

PROFESSIONAL EXPERIENCE - CONTINUED

NETWORK EGYPT

System Administrator Team Leader | Cairo, Egypt

Oct 2021 - Dec 2025

- Led system administration and technical support operations across Linux, Windows Server, cloud, and web-hosting environments, supporting both internal users and customer systems.
- Configured, maintained, and optimized WHM, cPanel, Plesk, Odoo, WordPress, webmail, Outlook, PHP-based applications, and related production services.
- Managed day-to-day infrastructure operations, system monitoring, preventive maintenance, and client/server issue resolution to maintain availability and reliable performance.
- Investigated and resolved complex hosting, email, application, operating-system, control-panel, and connectivity incidents across diverse customer environments.
- Developed preventive-maintenance schedules and monitoring routines to identify service degradation, hardware risks, capacity concerns, and potential failures at an early stage.
- Improved system uptime by 20% through proactive monitoring, structured maintenance planning, faster incident response, and stronger operational follow-up.
- Implemented CSF Firewall configurations and enhanced server-security policies, endpoint protection, antivirus controls, email protection, and secure-access procedures.
- Created scripts to automate recurring Linux operations, maintenance activities, routine checks, and controlled server-reboot procedures.
- Managed employee onboarding and offboarding, user permissions, account provisioning, and access-control activities to support secure workforce transitions.
- Monitored system temperature, power usage, hardware health, storage, and resource utilization to detect early warning signs and protect service continuity.
- Prepared technical reports covering system performance, incidents, downtime, operational risks, and recommended corrective actions for management and stakeholders.
- Worked within ITSM and WMCS ticketing systems, handled incidents and service requests, and collaborated with users and stakeholders to improve usability and service quality.

EDUCATION

Bachelor's Degree in Management Information Systems (MIS) | El-Shorouk Academy, Cairo, Egypt | May 2021

Grade: Good | Graduation Project: Development of the "Stay Positive" Application | Project Grade: Excellent

EARLY CAREER TRAINING

BANQUE DU CAIRE

System Administrator Intern | Cairo, Egypt

Jun 2020 - Sep 2020

- Installed, configured, monitored, and troubleshoot Linux operating systems, including Red Hat Admin I, CentOS, Alma Linux, and Cloud Linux.
- Configured and troubleshoot Apache web-server environments and developed an understanding of information-storage and management concepts.
- Administered Windows Server services, including Active Directory, DHCP, and DNS, within structured training environments.
- Built practical knowledge of networking, computer system security, infrastructure troubleshooting, and service administration.

ITS - INTERNATIONAL TURNKEY SYSTEMS

Database Administration Intern | Cairo, Egypt

Jun 2019 - Sep 2019

- Completed hands-on training in MySQL administration, database fundamentals, relational concepts, and SQL Server.
- Practiced database creation, structured querying, basic maintenance, and data-management activities.

CORE TECHNICAL EXPERTISE

Technical Support / ITSM: Incident management, service requests, escalation handling, SLA/KPI monitoring, ticketing systems, customer support

Systems Administration: Linux, Windows Server, Active Directory, file-system administration, patching, upgrades, maintenance, performance optimization

Hosting / Applications: cPanel, WHM, Plesk, WordPress, Odoo, PHP-based applications, webmail, Outlook, Microsoft 365

Cloud / Infrastructure: Cloud infrastructure management, migrations, virtualization, proactive monitoring, capacity planning, high availability

Networking / Security: TCP/IP, DNS, DHCP, network troubleshooting, CSF Firewall, endpoint protection, access control, system hardening

Backup, Recovery / Automation: Backup administration, disaster recovery, JetBackup, Bash scripting, recurring-task automation

Leadership / Operations: Team leadership, task distribution, technical review, onboarding, mentoring, workflow improvement, stakeholder reporting

CERTIFICATIONS / PROFESSIONAL TRAINING

Systems / Networking Certifications: Cisco Certified Network Associate (CCNA); Microsoft Certified Solutions Associate (MCSA); CompTIA A+; CompTIA Network+; CompTIA Server+; Red Hat Certified System Administrator (RHCSA)

Hosting / Cloud Technologies: cPanel & WHM System Administrator Certification; cPanel Professional Certification; Plesk Professional Certification; JetBackup Administration; WHM Server Administration

Database Training: SQL Server Fundamentals; Database Fundamentals; MySQL administration concepts

Development Fundamentals: Object-Oriented Programming (OOP); Web Fundamentals (HTML, CSS, JavaScript); C# Programming Basics; WordPress Administration

LEADERSHIP AND MANAGEMENT COMPETENCIES

- Team leadership, task distribution, workload prioritization, shift coordination, and operational planning.
- Technical supervision, quality review, performance assessment, onboarding, coaching, and mentoring of junior engineers and interns.
- SLA and KPI monitoring, IT service management, incident escalation, priority management, workflow optimization, and process improvement.
- Stakeholder communication, technical reporting, cross-team coordination, client support, and clear documentation of incidents and solutions.
